[capanoguzkagan](#)

Unity/C# mobile game developer with 6+ years across hypercasual, hybrid-casual, and casual genres from prototyping to live ops. Shipped and scaled a title to 1M+ players with strong engagement and ad + IAP monetization.

Ticket Empire: Transport Idle - 1M+ players · 44-min avg engagement · 100% crash-free
· [Google Play](#)

EXPERIENCE

● Freelance & Brand Projects

2024 – Present

Independent Game Developer

Built lightweight, brand-aligned Unity mini-games for digital media brands (Onedio, Maçkolik), owning each project from concept to delivery.

● 4US Games

2023 – 2026

Game Developer

Built and scaled Ticket Empire: Transport Idle (Unity hybrid-casual) to 1M+ players globally. Drove ad + IAP monetization (IronSource, AdMob) with a custom in-app economy; 44-min avg engagement, 100% crash-free.

● Noko Games

2021 – 2023

Lead Game Developer

Led gameplay development and rapid prototyping across multiple hypercasual/hybrid-casual titles; collaborated with publishers including Homa and Yso Corp; owned full dev cycle from concept to release-ready build.

● Digitech Education Technologies & ITC Play

2021

Game Developer

Developed multiple Unity/C# mobile titles including a mining game with live online data-extraction mechanics; supported co-development on hypercasual titles for external partners such as Trifles Games.

● HeadQuarter Games

2020 – 2021

Game Developer

Built multiple Unity mobile titles across genres (hypercasual, hybrid-casual); owned core gameplay systems and production-ready architecture from scratch.

SKILLS

■ Unity

■ C#

■ Git/GitHub

■ Mobile Optimization

■ SDK Integration

■ iOS & Android

■ English B2

ARCHITECTURE & TOOLS

■ MVC/MVP

■ ScriptableObject

■ State Machine

■ Event/Delegate Systems

■ Tool-assisted Workflow

SDK & SERVICES

■ Firebase

■ IronSource

■ PlayFab

■ AdMob

■ Remote Config

EDUCATION

2017–2020

Beykoz University

Information Security Technologies
